AIRBUS A330; Benefiting from over 20 years of continuous incremental innovation, the A330 is amongst the most modern, profitable and reliable commercial aviation aircraft in the market, providing a tailored solution for every market today and for the future and an ideal complement to its sister aircraft: the A350 XWB.

Plane Airbus A330 - SmartCockpit

According to Airbus, the A330-300's typical OEW is 267,200lbs-274,500lbs. In addition, for both the A330-200 and -300, Airbus points out that while the lower take-off weights still exist as certificated options, all recent customers have taken delivery of only the newest and most capable weight variants. This ensures ample range capability.

OWNER'S & OPERATOR'S GUIDE: A330-200/-300

For some, Airbus is a French company. However, the manufacturer is a multi-national operation in every single way possible: bringing various parts from various sites to its Final Assembly Line (FAL) locations in Canada, China, France, Germany and the United States, Airbus has become a global powerhouse in the aviation industry, not just a small European manufacturer.

Where are Airbus commercial aircraft manufactured?

The Airbus A330 is a wide-body aircraft designed and produced by Airbus. Airbus conceived several derivatives of the A300, its first airliner in the mid-1970s. Then the company began development on the A330 twinjet in parallel with the A340 quadjet and launched both designs with their first orders in June 1987. The A330-300, the first variant, took its maiden flight in November 1992 and entered ...
