Plainfield East High School

For multicellular organisms, communication between nearby or even distant cells is critical for the survival of the species. Even single celled organisms like bacteria have an evolutionary advantage when they "talk" with each other. Cells employ a variety of signaling pathways in order to send chemical messages from cell to cell.

12 Cellular Communication-S - Corner Canyon AP Biology

For multicellular organisms, communication between nearby or even distant cells is critical for the survival of the species. Even single celled organisms like bacteria have an evolutionary advantage when they "talk" with each other. Cells employ a variety of signaling pathways in order to send chemical messages from cell to cell.
