The blockchain is a peer to peer online ledger that uses cryptography for security. It is highly immutable, append-only and can be updated through an agreement between peers only. Since then, numerous organizations such as banks, transport, healthcare, supermarkets, insurance, voting and many more are using it.

## **The Ultimate Guide: All You Need To Know About Blockchain ...**

In simple terms, blockchain is a ledger system that uses an open, distributed record to keep track of transactions — transactions could mean cryptocurrencies, medical information, voting or home records, and more. These transactions get packaged into blocks, and each block gets verified by other users in the system by completing a math problem.
