The Predictive Maintenance Strategy course considers predictive maintenance as a component of a larger asset management strategy to diagnose, prevent and postpone failures. During this three-day course, you will learn the theory and application of multiple PdM technologies. You will review critical success factors of results-producing PdM programs.

Predictive Maintenance Strategy

Condition Based Maintenance (CBM), or Predictive Maintenance (PdM), is a maintenance strategy that involves monitoring and testing vital machine and equipment parameters for their state. This is done in order to predict machine failures and to do restoration to avoid hazards which could otherwise occur.

Predictive Maintenance Training Course by Online Distance ...

Maintenance Program Training Course Condition based maintenance (CBM), known as Predictive Maintenance (PdM), is a maintenance strategy that involves monitoring and testing vital machine and equipment parameters for their state. This is done in order to predict machine failures and to do restoration to avoid hazards which could otherwise occur ...

Predictive Maintenance Program and Condition Based ...

Predictive maintenance is a philosophy that uses the equipment's operating condition to make data-driven decisions and improve quality, productivity and profitability. Unlike industry courses that focus on applying specific technologies like vibration monitoring or oil analysis, this course focuses on establishing, managing and sustaining results from a comprehensive PdM program.

Predictive Maintenance Strategy - Shopping cart

It is possible to carry out PdM via visual inspections of equipment, but the easiest way to establish a predictive maintenance strategy is by using a CMMS to track meter readings. The advantage of PdM (over PM) is the potential for cost savings from reduced man-hours spent on maintenance, and more insight as to the performance and potential issues arising with the machine.

What Are The 4 Types of Maintenance Strategies? | Fiix

During this five-week interactive course, you will learn the application of two widely used predictive maintenance (PdM) technologies—ultrasound and thermography (infrared technology); how PdM fits into an overall maintenance and reliability management strategy, and how to implement and sustain PdM within an overall maintenance and reliability strategy.
