Repeating again: If your flash specifies Guide Number for 105 mm zoom, but you are using it at 24 mm zoom, you absolutely need to know and use the 24 mm zoom Guide Number (see your flash manual for its complete Guide Number chart for various zoom settings). Calculator Use Example.

Understanding Camera Flash Guide Numbers, plus GN Calculator

The flash guide number (GN) is a measure of the distance at which the flash can illuminate a subject. The higher the guide number, the greater the distance at which the light from the flash is sufficient for optimal exposure. The formula for calculating the guide number is as follows:

Flash Level (Guide Number) - Nikon | Imaging Products

The magnitude of guide numbers is a function of the following four variables: The total luminous energy (in lumen·seconds) emitted by the flash head (which is itself the product of the duration and the average luminous flux of a flash). See Glossary, below for illumination terminology.; The solid angle subtended by the circular- or rectangular-profile beam as it leaves the flash head (the ...
