Displacement And Resettlement In India

Development-induced displacement and resettlement (DIDR) occurs when people are forced to leave their homes and/or land as a result of development. This subset of forced migration has been historically associated with the construction of dams for hydroelectric power and irrigation but is also the result of various development projects such as mining, agriculture, the creation of military ...

ADVERTISEMENTS: During recent years, displacement of tribals has drawn the attention of several scholars. It is estimated that development schemes like dams, mines, industries and various projects have resulted in the displacement of about 40 per cent tribals between 1951 and 1991. The illiterate and powerless tribals have been compelled to leave their resource-rich regions [...]

Displacement and Resettlement of Tribals

India is one of the only countries in the world to have recognised the risks and impacts of displacement associated with development by drafting specific policies and legal frameworks on the issue. A 2004 national policy on families affected by projects was updated in 2007 and became the national rehabilitation and resettlement policy .

India | IDMC

group saw displacement to be an inevitable outcome of development. They suggest, the only policy option is to minimise the adverse impact of displacement. [7][8] For them resettlement becomes the key focus area. While the other group, considers displacement as a manifestation of a crisis in development itself.
