And 1.8 is the latest version for docker-compose, am I right? So what's wrong? - wuzzapcom Dec 25 '17 at 22:30. 1. No, 1.18.0 is the latest version. Version 1.8.0 is about a year old and only supports up to version 2 of the format. I think you are mixing up 1.18.0 and 1.8.0. - Andy Shinn Dec 25 '17 at 23:49.

Version in docker-compose is unsupported - Stack Overflow

+1; In this article. EDITION v3.1 - Updated to ASP.NET Core 3.1. Refer changelog for the book updates and community contributions. Compose and Docker compatibility matrix. There are several versions of the Compose file format - 1, 2, 2.x, and 3.x. The table below is a quick look. For full details on what each version includes and how to upgrade, see About versions and upgrading. This table shows which Compose file versions support specific Docker releases.

Compose file version 2 reference | Docker Documentation

Docker is a set of platform as a service (PaaS) products that use OS-level virtualization to deliver software in packages called containers. Containers are isolated from one another and bundle their own software, libraries and configuration files; they can communicate with each other through well-defined channels. All containers are run by a single operating system kernel and therefore use ...

Docker (software) - Wikipedia

In part 1 of the series, we took a look Docker and some of its key concepts. Then we took the default template for a Blazor Server app and containerised it using Docker. In this post, we are going to take a look at doing the same thing but with a Blazor WebAssembly app.

Containerising a Blazor WebAssembly App
