vGATE User's Guide Physics-list selection and recommendations With the new Gate versions 7.0 and above, it is recommended to use the Physics-builder mechanism, using predefined physics-lists (Recommended Geant4 physics-list for medical applications)

Documentation and Recommendations for Users | GATE

Look at the rest of the wiki, the overview of GATE Documentation and especially the user guide. You can view the whole user guide in a single web page for easier searching. Finally, search the mailing list or ask your question on the list. Or consider getting help from the experts.

GATE.ac.uk - wiki/gate-user-faq.html

In GATE, detector electronic response is modeled as a linear processing chain designed by the user to reproduce e.g. the detector cross-talk, its energy resolution, or its trigger efficiency. The first users guide was organized as follow: chapter 1 of this document guides you to get started with GATE. The macro language is detailed in Chapter 2.

1. Introduction — GATE documentation

Gate will read and execute those files in the order in which they appear. Notice that /control/execute does not start a simulation (data acquisition), it simply reads the commands and executes them. The command that starts the actual simulation is /gate/application/startDAQ, which is usually the last command found in you macro files.

9. How to run Gate — GATE documentation

Gate, just as GEANT4, is a program in which the user interface is based on scripts. To perform actions, the user must either enter commands in interactive mode, or build up macro files containing an ordered collection of commands.
