Graphical Method of Solving Linear Programming Problems We already know how to plot the graph of any linear equation in two variables. The process involves plotting the points that satisfy the equation on the coordinate axis and joining them.

Graphical Method of Solving Linear Programming Problems

To find the graphical solution of linear programming problems, we have to follow a few steps. Step 1) Formulate the problem using the objective and the constraints. Step 2) Frame the graph by plotting the constraints lines. Step 3) In this step, determine the valid side of
