Here's a pint-sized crystal radio with enough oomph to drive a 2 1/2" speaker. This units selectivity is far better than you would expect to find in a crystal receiver and volume is equal to that obtained with a transistor. No external power source is required. The unusual selectivity of this radio is due to its special double-tuned circuit.

Crystal Radios: Stay Tuned Crystal Sets

The FM crystal radio tunes into a centre frequency of the FM radio stations you want to listen to e.g. 88Mhz. The frequency is modulated according to the sound wave or the loudness of the original vocal/music being broadcasted, i.e. the frequency may shift between 87.97Mhz or 88.03Mhz .

Simple yet loud FM Crystal Radio - The RadioBoard Forums

In a crystal radio, a single semiconductor gem or mineral (galena being a common choice) is used to transform the radio signals your radio can pick up into audio signals you can listen to. The earliest models of these devices utilized a fine wire just touching the surface of the gem, a setup known as a cats-whisker detector, a title from which some of these early radios took their
