This study explored the feasibility of implementing and evaluating ward-based team clinical supervision for general nurses on two separate wards at one public and one private hospital. Nurses completed the Work Environment Questionnaire pre- (n = 36) and postintervention (n = 27), and focus groups (n = 20) explored their perceptions of supervision.

Team Clinical Supervision in Acute Hospital Wards: A ...

To determine distribution of severe acute respiratory syndrome coronavirus 2 in hospital wards in Wuhan, China, we tested air and surface samples. Contamination was greater in intensive care units than general wards. Virus was widely distributed on floors, computer mice, trash cans, and sickbed handrails and was detected in air \approx 4 m from patients.

Aerosol and Surface Distribution of Severe Acute ...

Three of the case study wards were located at the Kent and Sussex Hospital in Tunbridge Wells, which opened in 1934 as a purpose-built facility. It featured south-facing traditional Nightingale wards (with rows of beds on either side) and three-quarter-height glazing, designed to maximise fresh air and sunlight to support patient recovery.
