Naval Ships Technical Manual, Chapter 997 (10) cites the load- deflection curve for a "typical composite block" which indicates a FSPL of about 3,450 kPa (500 psi). This reference also lists deflection data for tests on eight composite keel block buildups (these tests will be discussed later in comparison with results of the present study).

Folks, The Elements and Practice of Rigging And Seamanship, 1794, by David Steel, is a comprehensive English textbook of rigging, seamanship and naval tactics. A key reference for those interested in the age of Nelson. Although at times difficult because of its fine detail, it will reward those that search through it to understand the technology of the era.
