Nexus OTA updates are a bit of an enigma—they come straight from Google, but they also depend on carrier approval before they can be sent to devices on certain networks. Getting the latest OTA update meant either waiting a few weeks, or manually flashing a full factory image, which can be a bit janky. Now, however, the process is more streamlined, so you can flash the latest update with one ...

...

Manual Update for Nexus One March 1, 2011. I am writing this as the release for Gingerbread (2.3) is being slowly released OTA, but the same steps apply regardless of the rom version you are eagerly awaiting. This is safe and repeatable, and I have done it for 3 updates on 2 devices now, so I am very confident nothing will go wrong.
