Scientific writing 2.0 : a reader and writer's guide ...

Scientific writing in English started in the 14th century. The Royal Society established good practice for scientific writing. Founder member Thomas Sprat wrote on the importance of plain and accurate description rather than rhetorical flourishes in his History of the Royal Society of London. Robert Boyle emphasized the importance of not boring the reader with a dull, flat style.

Scientific writing - Wikipedia

We all have a lot going on in our lives -- your text should be a place where the reader can relax and enjoy interesting, straightforward information. 20. Be Precise. People love details. Using detail in your writing shows that you're a person who really knows what you're writing about - a person to be trusted. Be as specific as you can.
